🗣️ English B2

Detail-oriented web developer passionate about creating web systems using modern technologies. Eager to explore opportunities, contribute creativity, innovation, and technical expertise to software development projects, as well as share my knowledge with others.

EXPERIENCE

UCAMP
2021 – Present

JavaScript Web Development Instructor

Responsible for teaching web development courses, ranging from HTML and CSS fundamentals to advanced JavaScript. Additionally, mentor students by fostering practical skills through projects focused on modern web development.

Onikom
2022 – Jun 2025

IT Support Consultant

Responsible for managing the training platform using Moodle, including course administration, deployments, configurations, and troubleshooting. Provide technical support by making adjustments and restoring services during incidents to ensure the platform's operational continuity. Additionally, manage VPS servers using GCP and AWS.

Acarentals
2015 – Oct 2022

Web Developer and IT Infrastructure Administrator

Responsible for developing and maintaining the company's website, ensuring its proper functionality and optimization. Created APIs for internal systems. Managed IT infrastructure, including server administration, email account configuration, implementation of digital signatures, social media management, network equipment and printing device setup, technical support for employees, and email marketing configuration.

PostgreSQL
Prisma

RECENT PROJECTS

Academic Management System

Developed a system that allows teachers to create semesters and activities, and enables students to view their grades using their student ID numbers. Technologies used: Next.js, TypeScript, MySQL, and Prisma. Deployed on Vercel.

https://calificaciones-cetmar.vercel.app/

School Manager System

Developed a desktop school system using Electron JS for managing tuition fees, teacher schedules, subject assignments, student information, and other modules. As a frontend developer, I created the interface following the proposed UI/UX design and connected with the endpoints using Swagger documentation.

Zoohabitat

Developed a veterinary management system using Vue.js. In this project, I was responsible for the frontend and resolving client-requested issues.

EDUCATION

UCAMP
2020-2021

Bootcamp in FullStack JavaScript Web Development

Strengthened web development skills in both front-end and back-end using JavaScript. Worked on projects utilizing the MERN stack (MongoDB, Express, React, Node).

UNID
2018-2019

Master's Degree in Education Professional Mexican License #12174501

Gained a deep understanding of integrating emerging technologies into educational environments to enhance the teaching-learning process. The program specialized in new technologies.

UNID
2013 - 2016

Bachelor's Degree in Information Systems Engineering Professional Mexican License #10737745

Developed a solid foundation in the analysis, design, development, and management of information systems. The program focused on leveraging information technologies to optimize business processes and solve complex problems.
